## EDUCATION

### Vellore Institute of Technology

*Bachelor of Technology in Computer Science and Engineering*

Bhopal, Madhya Pradesh

2023 - 2027

### Kendriya Vidhyalaya

*Higher Secondary CBSE*

Sector 47, Chandigarh

2020 - 2022

## PROJECTS

### Streamly | WebRTC, React.js, Node.js, Express.js, JavaScript, Tailwind CSS, REST APIs

Nov 2024 – Present

- Built and owned a full-stack real-time video/audio streaming platform using React.js on the frontend and Node.js + Express for backend APIs
- Implemented low-latency peer-to-peer communication with **WebRTC**, handling signaling, connection setup, and media streaming
- Added client-side media recording using the **MediaRecorder API**, enabling users to record and store live sessions efficiently
- Designed a clean, responsive UI with Tailwind CSS, optimized for fast iteration and cross-device usage
- Developed backend REST APIs to manage session lifecycle, recording metadata, and media-related operations, ensuring efficient request handling

### Dr. Bot (CDSS) | Python, Flask, Machine Learning, REST APIs

June 2024 - Aug 2024

- Developed a **Clinical Decision Support System** using a **binary disease-symptom dataset** to assist in preliminary disease prediction.
- Implemented data preprocessing and feature handling pipelines to map symptom inputs to disease outcomes.
- Built backend using **Flask**, exposing RESTful APIs for disease prediction and system interaction.
- Integrated the prediction logic into a web-based interface, enabling real-time inference based on user-provided symptoms.
- Designed the system with a focus on **fast response time and modular architecture** to support future model upgrades.

### Blocoin | React.js, Solidity, Web3.js, RESTful APIs, JavaScript, Tailwind CSS

Dec 2023 – March 2024

- Developed a decentralized web application with **Ethereum smart contract** integration and **MetaMask wallet connectivity**.
- Implemented **persistent wallet session handling** to retain user connection state across page refreshes, eliminating repeated MetaMask connection prompts.
- Utilized **Web3.js** to manage account state, network detection, and contract interactions from the client side.
- Integrated **RESTful APIs** to streamline transaction-related workflows and improve UI responsiveness during blockchain operations.
- Built responsive and intuitive frontend components using **React.js and Tailwind CSS** for seamless blockchain interaction.

## EXPERIENCE

### Technical Lead (Android Club)

2024 – Present

*Vellore Institute Of Technology*

*Bhopal, Madhya Pradesh*

- Led technical execution of a student event, overseeing system design and operational reliability.
- Developed a **payment verification system** to reconcile **Google Form registrations** with received payments, including checks for missing, duplicate, and inconsistent entries.

## TECHNICAL SKILLS

**Languages:** C/C++, Python, JavaScript, MySQL

**Frameworks:** React, Node.js, FastAPI

**Technologies:** Git, GitHub, Web (HTML/ CSS), Supabase

**Core:** Data Structures, Algorithms, Networking, Web Development
